--AN OCIF-BINDING MOLECULE (OBM), NUCLEIC ACID ENCODING, AND PROCESS FOR PRODUCING THE SAME--

Please replace the abstract as originally filed with the following abstract.

--AN OCIF-BINDING MOLECULE AND PROCESS FOR PRODUCING THE SAME

Abstract

C3

Novel proteins and polypeptides binding to osetoclastogenesis inhibitory factor (OCIF) (OCIF-binding molecules, OBMs) and nucleic acids encoding these proteins and polypeptides are provided. A process for producing these proteins, polypeptides, and nucleic acids molecules by genetic engineering is provided. Medicinal compounds are provided which comprise proteins and nucleic acids according to the invention, as well as proteins which bind to OBM, including anti-OBM antibodies. These compounds may be used for the treatment of bone disease.--
